

TENNESSE RIVER EYE CLINIC
TREC Specs Optical
256-381-2020

March 15, 2020 Tennessee River Eye Clinic heeds valid warnings about the COVID-19 pandemic. For our patients and staff's safety and for all of our roles in reducing the mortality of this new virus we enact the following policies.

Please, do not enter the office if:

- 1** You have **any respiratory illness** (sick, fever, cough or shortness of breath).
- 2** You have had **close contact with someone who has had a recent respiratory illness.**
- 3** You have **travelled outside of the country or state in the past 14 days.**
- 4** You are over **age 70.**
- 5** You have **any chronic respiratory problems, compromised immune system, or significant medical problems.**

Consider rescheduling, *by phone*, if your appointment is completely routine, such as a yearly exam or glaucoma check.

We are open! If you have an urgent problem, please call for an appointment.

If you have had a recent procedure you need to keep your follow up appointments. Call if you want to change the time.

You can briefly check in, and wait in your car.

Our staff has these same restrictions. Please be patient as recommendations change now, and as we accommodate a busier schedule as this crisis wanes. We anticipate these schedule limitations will continue until March 29, 2020.
